

The adventures of

**CATAMAN**

Saving the  
world through  
recycling

**A project by:**

**Nathalia Adames**

Universidade Franciscana Master's degree  
student in Maternal and Child Health

**Advisor:**

**Prof. Dra. Dirce Stein Backes**

# *The adventures of* **CATAMAN**

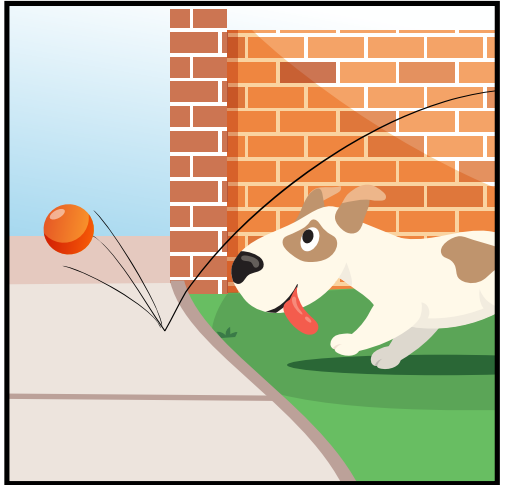

This pamphlet is the fruit of a research-action project developed in a Recyclable Materials Association under the leadership of the student Nathalia Adames, from the Maternal and Child Health Master's of Universidade Franciscana and it's advisor Prof. Dirce Stein Backes.

The pamphlet "Saving the world through recycling" has the goal of developing the culture of environmental sustainability from habits and simple practices with recycling and the correct disposal of trash in our homes, on the street, school and public places. Our intention with this comic is to stimulate children and their families to awareness and responsible action with our common home, Mother Earth.

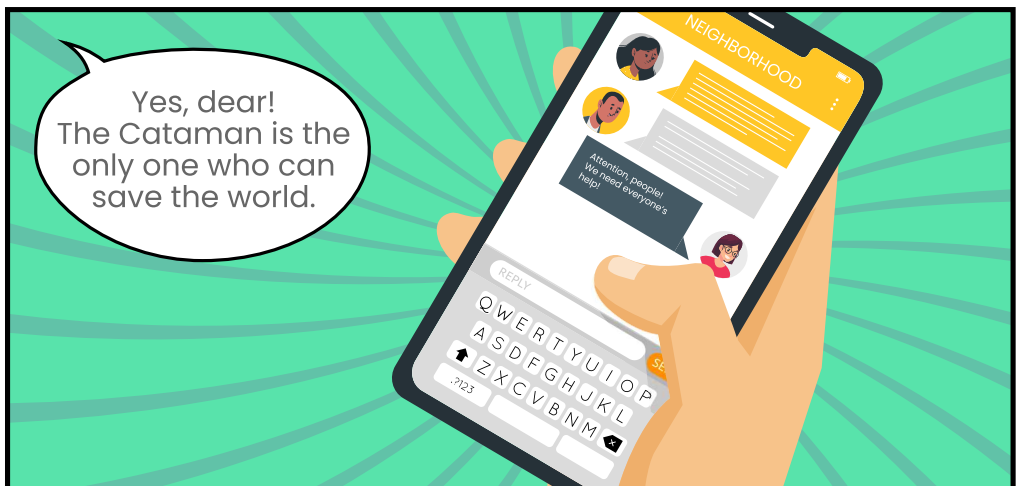

Dear children, you are going to be the protagonists of a new history. We count immensely on you.

*Let's go!*

In a town where everything seemed calm...

Sujismundo is gaining power. We need more help!

**WOW!**

**Look!**

**Oh!**

I'm here!  
I'm ready to end  
Sujismundo and  
save the world of  
this garbage!

Where is Cataman  
taking the trash, mom?

He's taking the trash  
to a **recycling center**.  
In these places they reuse  
the materials.

Reuse it?

Yes, the trash turns into new material through recycling.

Wow!

## How to contribute to recycling?

- 1** Separate recyclable materials from organic.
- 2** Wash packages which are going to selective collect, since food remains cause contamination.
- 3** Put these packages in separate trash bags.
- 4** Wait for the correct day to place the bags on the street.

**METAL**

**PAPER**

**PLASTIC**

**GLASS**

# What can and can't be recycled?

**Can** ✓

**Can't** ✗

Drink cans  
Food cans  
Bottle caps  
Metallic packages  
Iron scrap

Paint cans  
Spray cans  
Insecticide cans  
Steel sponges

Office paper  
Cardboard  
Newspaper  
Magazines  
Long life packages

Toilet paper  
Paper tissues  
Carbon paper  
Napkins  
Glue tape  
Photographs

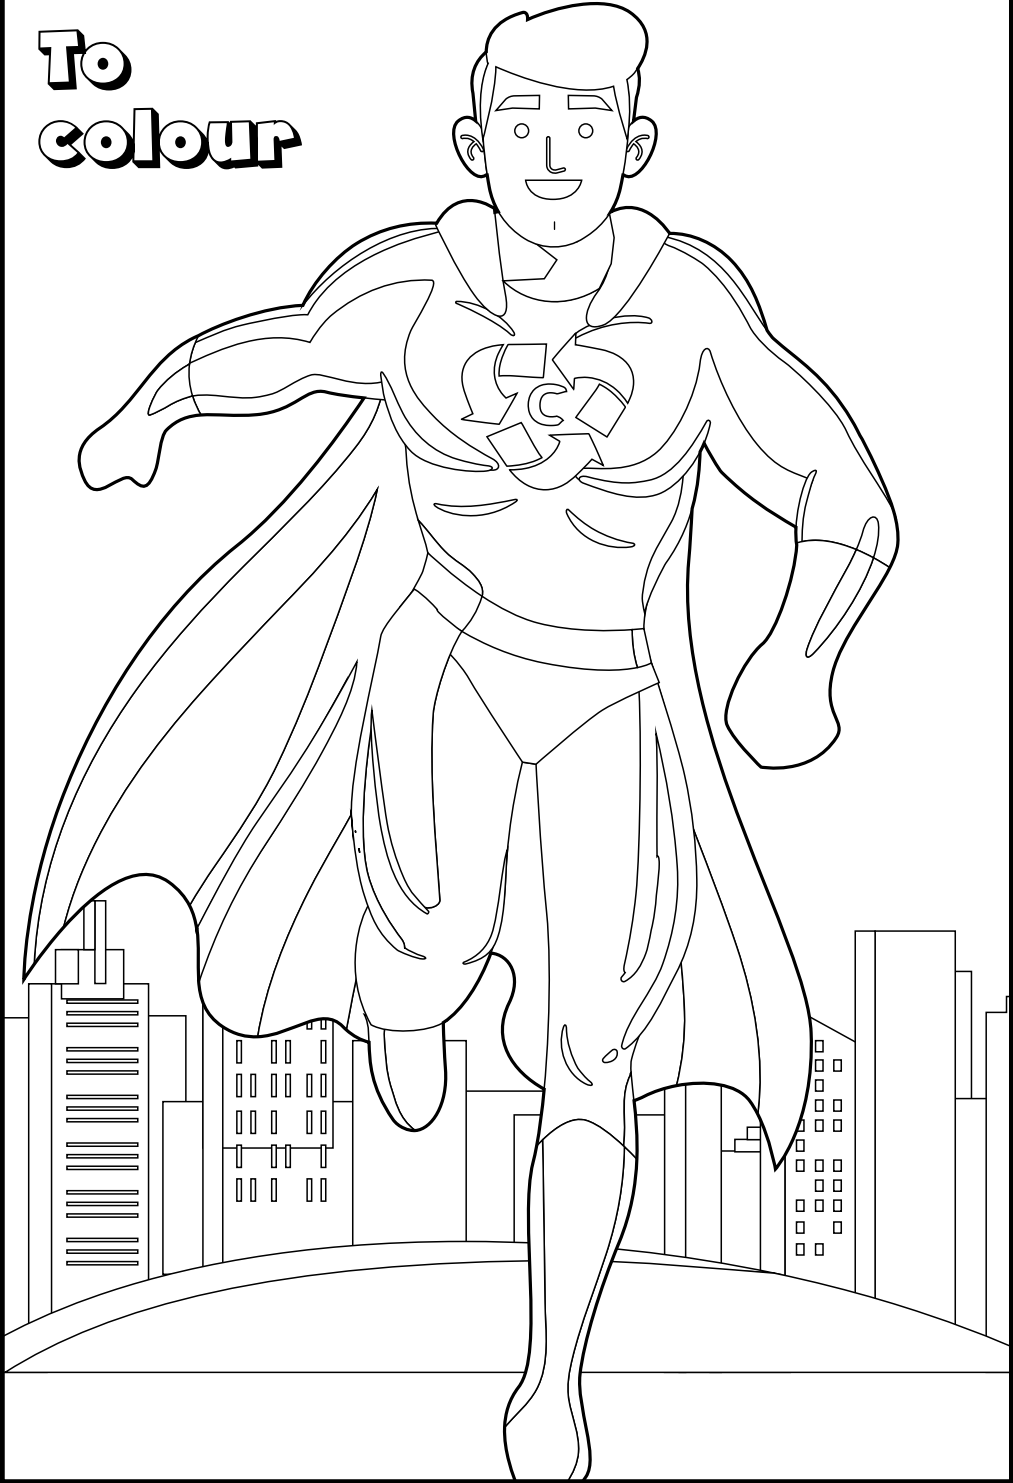

Bottles  
Cups  
Vials  
Food pots

Mirrors  
Window glass  
Car glass  
Lamps

Plastic bottles  
Cleaning product packages  
Bags, plastic bags and milk bags  
Styrofoam  
Inkless pen  
Buckets

Metallic packages (snacks)  
Cookie packages  
Corrosive and toxic material packages  
Acrylic  
Power plugs
